Subject index

Aluminum
An in situ tunneling microscopic study of polycrystalline aluminum in sodium hydroxide solution (Bhardwaj et al.) 195
Aromatic halides
Organic dianions as reducing species. Part 1. Redox catalysis using thianthrene-9,9,10,10-tetraoxide dianion towards aromatic halides (Hoffmann et al.) 155

Biphenyls
The determination of absolute electron affinities of chlorobenzenes, chloronaphthalenes and chlorinated biphenyls from reduction potentials (Wiley et al.) 169
Bipyridine
Use of isopotential points to elucidate ion exchange reaction mechanisms. $Cr(bpy)_3^{3+}$ at montmorillonite clay-modified electrodes (Edens et al.) 139

Carbon
Electrochemical pretreatment of carbon fibre microelectrodes for the determination of folic acid (O'Shea et al.) 63
Preparation of doped carbon films (Ingersoll, Huskisson) 281
XANES study of underpotential deposited copper on carbon-supported platinum (McBreen et al.) 229
Carbon monoxide
The electrooxidation of carbon monoxide on platinum as examined by surface infrared spectroscopy under forced hydrodynamic conditions (Roth, Weaver) 119
Study of the electrooxidation of carbon monoxide on rhodium in acid and alkaline media by UV–visible potential-modulated reflectance spectroscopy and cyclic voltammetry (Caram, Gutiérrez) 99
Catalysis
The catalytic oxidation of hypophosphite on nickel studied by electrochemical mass spectrometry (Jusys et al.) 87
Homogeneous redox catalysis. Application to the kinetic characterization of intermediates undergoing fast bimolecular decay approaching the diffusion limit (Andrieux et al.) 17
Charge transfer
On possible systematic errors in determinations of charge transfer kinetics at very small electrodes (Baranski) 287
Chloride ion
The effect of tin(II) chloride adsorption on the electrochemical oxidation of tin(II) and other reactions at gold and platinum electrodes (Mandler, Bard) 217
Chlorobenzenes
The determination of absolute electron affinities of chlorobenzenes, chloronaphthalenes and chlorinated biphenyls from reduction potentials (Wiley et al.) 169
Chloronaphthalenes
The determination of absolute electron affinities of chlorobenzenes, chloronaphthalenes and chlorinated biphenyls from reduction potentials (Wiley et al.) 169
Chromium
Use of isopotential points to elucidate ion exchange reaction mechanisms. $Cr(bpy)_3^{3+}$ at montmorillonite clay-modified electrodes (Edens et al.) 139
Computer analysis
Computer analysis of natural convection in thin-layer thermocells with a soluble redox couple. Part 1. Method and the unsteady problem (Ikeshoji et al.) 29
Conductivity data
Reliability of the parameters calculated from conductivity data (Balkowska et al.) 13
Convection
Computer analysis of natural convection in

thin-layer thermocells with a soluble redox couple. Part 1. Method and the unsteady problem (Ikeshoji et al.) 29

Copper

Difference reflectance spectroscopy of anodic films on copper and copper base alloys (De Sanchez et al.) 73

XANES study of underpotential deposited copper on carbon-supported platinum (McBreen et al.) 229

Cyclic voltammetry

Study of the electrooxidation of carbon monoxide on rhodium in acid and alkaline media by UV–visible potential-modulated reflectance spectroscopy and cyclic voltammetry (Caram, Gutiérrez) 99

Diffusion

Precision of impedance spectroscopy estimates of bulk, reactionrate, and diffusion parameters (Macdonald, Franceschetti) 1

Diffusion limit

Homogeneous redox catalysis. Application to the kinetic characterization of intermediates undergoing fast bimolecular decay approaching the diffusion limit (Andrieux et al.) 17

Folic acid

Electrochemical pretreatment of carbon fibre microelectrodes for the determination of folic acid (O'Shea et al.) 63

Glucose oxidase

Mediated electron transfer for the electrooxidation of glucose oxidase by manganese tetrakis(*o*-aminophenyl)porphyrin (Rishpon et al.) 293

Gold

Adsorption of pyridine at the Au(111)–solution interface (Stolberg et al.) 241

The effect of tin(II) chloride adsorption on the electrochemical oxidation of tin(II) and other reactions at gold and platinum electrodes (Mandler, Bard) 217

Temperature dependence of proton electroreduction kinetics at gold(111) and (210) surfaces and annealing of surface defects (Hamelin et al.) 183

HMRD

The hanging meniscus rotating disk (HMRD) (Cahan, Villullas) 263

Hypophosphite ion

The catalytic oxidation of hypophosphite on nickel studied by electrochemical mass spectrometry (Jusys et al.) 87

Impedance spectroscopy

Precision of impedance spectroscopy estimates of bulk, reaction rate, and diffusion parameters (Macdonald, Franceschetti) 1

IR spectroscopy

The electrooxidation of carbon monoxide on platinum as examined by surface infrared spectroscopy under forced hydrodynamic conditions (Roth, Weaver) 119

Isopotential points

Use of isopotential points to elucidate ion exchange reaction mechanisms. $Cr(bpy)_3^{3+}$ at montmorillonite clay-modified electrodes (Edens et al.) 139

Kinetics

Homogeneous redox catalysis. Application to the kinetic characterization of intermediates undergoing fast bimolecular decay approaching the diffusion limit (Andrieux et al.) 17

On possible systematic errors in determinations of charge transfer kinetics at very small electrodes (Baranski) 287

Precision of impedance spectroscopy estimates of bulk, reaction rate, and diffusion parameters (Macdonald, Franceschetti) 1

Temperature dependence of proton electroreduction kinetics at gold(111) and (210) surfaces and annealing of surface defects (Hamelin et al.) 183

Manganese

Mediated electron transfer for the electrooxidation of glucose oxidase by manganese tetrakis(*o*-aminophenyl)porphyrin (Rishpon et al.) 293

Microdisk electrodes

Renewal of boundary conditions in pulse voltammetry at microdisk electrodes for non-reversible systems (Karpinski, Osteryoung) 47

Microelectrodes

Electrochemical pretreatment of carbon fibre microelectrodes for the determination of folic acid (O'Shea et al.) 63

Montmorillonite

Use of isopotential points to elucidate ion

exchange reaction mechanisms. $Cr(bpy)_3^{3+}$ at montmorillonite clay-modified electrodes (Edens et al.) 139

Nickel
The catalytic oxidation of hypophosphite on nickel studied by electrochemical mass spectrometry (Jusys et al.) 87

Oxygen
Novel photogalvanic effect of the viologen cation radical formed electrochemically in the presence of oxygen (Kaneko, Wöhrle) 209

Photogalvanism
Novel photogalvanic effect of the viologen cation radical formed electrochemically in the presence of oxygen (Kaneko, Wöhrle) 209

Platinum
The effect of tin(II) chloride adsorption on the electrochemical oxidation of tin(II) and other reactions at gold and platinum electrodes (Mandler, Bard) 217
The electrooxidation of carbon monoxide on platinum as examined by surface infrared spectroscopy under forced hydrodynamic conditions (Roth, Weaver) 119
XANES study of underpotential deposited copper on carbon-supported platinum (McBreen et al.) 229

Polypyrroles
Fast redox switching of polypyrrole films on ultramicroelectrodes (Abrantes et al.) 275
Mechanistic studies of the electrosynthesis of polypyrroles (Rau et al.) 269

Porphyrin
Mediated electron transfer for the electrooxidation of glucose oxidase by manganese tetrakis(o-aminophenyl)porphyrin (Rishpon et al.) 293

Pulse voltammetry
Renewal of boundary conditions in pulse voltammetry at microdisk electrodes for non-reversible systems (Karpinski, Osteryoung) 47

Pyridine
Adsorption of pyridine at the Au(111)–solution interface (Stolberg et al.) 241

Reflectance spectroscopy
Difference reflectance spectroscopy of anodic films on copper and copper base alloys (De Sanchez et al.) 73
Study of the electrooxidation of carbon monoxide on rhodium in acid and alkaline media by UV–visible potential-modulated reflectance spectroscopy and cyclic voltammetry (Caram, Gutiérrez) 99

Rhodium
Study of the electrooxidation of carbon monoxide on rhodium in acid and alkaline media by UV–visible potential-modulated reflectance spectroscopy and cyclic voltammetry (Caram, Gutiérrez) 99

Rotating disk electrode
The hanging meniscus rotating disk (HMRD) (Cahan, Villullas) 263

Sodium hydroxide
An in situ tunneling microscopic study of polycrystalline aluminum in sodium hydroxide solution (Bhardwaj et al.) 195

Thermocells
Computer analysis of natural convection in thin-layer thermocells with a soluble redox couple. Part 1. Method and the unsteady problem (Ikeshoji et al.) 29

Thianthrene
Organic dianions as reducing species. Part 1. Redox catalysis using thianthrene-9,9,10,10-tetraoxide dianion towards aromatic halides (Hoffmann et al.) 155

Tin
The effect of tin(II) chloride adsorption on the electrochemical oxidation of tin(II) and other reactions at gold and platinum electrodes (Mandler, Bard) 217

Tunneling microscopy
An in situ tunneling microscopic study of polycrystalline aluminum in sodium hydroxide solution (Bhardwaj et al.) 195

Ultramicroelectrodes
Fast redox switching of polypyrrole films on ultramicroelectrodes (Abrantes et al.) 275

UV–visible spectroscopy
Study of the electrooxidation of carbon monoxide on rhodium in acid and alkaline media by UV–visible potential-modulated reflectance spectroscopy and cyclic voltammetry (Caram, Gutiérrez) 99

Viologen
Novel photogalvanic effect of the viologen cation radical formed electrochemically in the presence of oxygen (Kaneko, Wöhrle) 209

XANES
XANES study of underpotential deposited copper on carbon-supported platinum (McBreen et al.) 229
